Dear Marion

re Accident and Emergency Experience for Bedford College Nursing Students

I am sorry that we have not been able to get into direct contact but I have been exploring possibilities for the above experience. Unfortunately the period you have given us is a particular time when we have a large group going through the experience and it is also likely that one of our A/E departments will be closing just before that time because of a change of use of one of our hospitals. This is bound to have the same effect on us as is happening at the Middlesex.

I am at a loss to know what to suggest as the future pattern of accident and emergency services after next Spring is uncertain. I wish I could help you but I think I would only be making false promises if I were to hold out any real hope. Good luck.

Yours sincerely

S J Holder (Mr)
Director of Nurse Education
