TUTOR'S REPORT

Public Health Students - January - May 1938.

Three of our public health students joined the study week arranged in Birmingham by Dr. Mess for the Social Studies' students. Our two English Health Visitors found it most illuminating, giving them a picture of the social services and the industrial conditions of a typical district. Miss Lagercrantz, the third member was particularly interested as she will be returning to Sweden to take a post as a hospital almoner.

I planned a ten day programme for Miss Wheelock in Manchester, mainly with the Health Department there, and she was the guest of Miss Duff Grant at the Manchester Royal Infirmary during her stay.

Miss Mambuca, Miss Buchanan and Miss Wang saw a good deal of public health work on the Continent and have written some good reports of special pieces of work they saw which interested them particularly.

Miss Hoogenboezem had two weeks in the Birmingham Health Department and a week with the Mental After Care Association in London.

I am planning two weeks practical work for them from July 1st - 15th, but Miss Lagercrantz has asked particularly to be excused this period as it is a term of her appointment in Stockholm that she returns there on July 1st. I have permission from the Swedish Committee to ask for this concession for her.
