REPORT OF PRACTICAL WORK - PUBLIC HEALTH STUDENTS

October 1932.  
-----

The practical work has been planned much on the same lines this year as in the past. I have tried to give each student two weeks' observation in each of the three services: Maternity and Child Welfare, School Nursing and Tuberculosis. The Maternity and Child Welfare is mainly planned in the Infant Welfare Centres in Lambeth, but the Westminster Health Society and the Violet Melchet Centres have both taken a Student this year. During their two weeks with me I am able to help them to study case papers, and we discuss the plans made for individual families over a period of some months and years. I am also able to know each Student better in this way and to judge for myself of her practical ability. I have no hesitation in saying that the Students in the Public Health Group this year are well up to the average in their practical work and in their understanding. I have very good reports of Miss Nel, Miss Bettendorff, Miss Theys and Miss Wickham, and I have no hesitation in recommending to Mrs. Reid that Miss Theys, Miss Monkuti and Miss Soljan should be accepted for the Course.
