

11th November, 1927.

Dear Mrs. Carter,

You will remember that the International Committee recommended that the lectures on Public Health should be given by Miss Baggallay, Miss Smith, Miss Dorsey and Miss Viney. We are not quite sure whether Miss Smith and Miss Dorsey as servants of the League should be offered additional fees for this work. Would you kindly let me know your opinion on the matter.

With regard to the proposal that Dr. Rene Sand should be invited to give two or three general lectures, Mrs. Reid asks me to ask you whether you would like him to be reserved for the Summer School as she feels he would be particularly valuable for this purpose.

Yours sincerely,

Secretary.
