ANNOUNCEMENT OF INTERNATIONAL COURSES

There is an increasing demand in all countries for nurses trained in public health work and for directors and teachers of nursing education in training schools, who are qualified to emphasize the preventive and social, as well as the curative aspects of disease.

In order to help in meeting this demand, the League of Red Cross Societies, with the co-operation of various nursing, educational, social service and health authorities, has established two courses at Bedford College for Women, University of London, in conjunction with the College of Nursing; an International Course in Public Health for Nurses, and an International Course for Nurse Administrators and Teachers in Schools of Nursing. A certificate is awarded upon the satisfactory completion of a course.

The Bedford College session is divided into three terms averaging ten to eleven weeks each. Students attend at the College an average of twelve hours a week throughout the year, including lectures and individual coaching.

The English system of University education lays great stress on the value of reading and discussions in small classes under the guidance of teachers, the lectures being regarded as a basis for individual study.

In view of the fact that each student brings to the courses a vastly different background of previous training and nursing standards, origin and education, and that the problems that will confront each upon her return to her native country will be considerably different, the curriculum has been adapted to provide, as far as possible, the maximum of individual tuition for each student. Special emphasis may be given to any of the branches of work in which a student may wish to specialize, and additional lectures followed at the discretion of the Administrative Committee.

The importance of devoting two months to practical work and observation in hospitals or with public health organizations preparatory to the courses has been recognized. Therefore, it has been arranged for students to spend August and September and, if necessary, additional time at Christmas and Easter in practical work to familiarize themselves with English nursing methods and health procedures. Further practical work may be arranged at the completion of the courses for nurses desiring more experience in England or on the Continent. A two weeks' vacation is granted at Christmas and Easter.

For students from countries where there is no complete system of training for nurses, facilities will be provided for securing this supplementary training in order to enable them to qualify for the post-graduate course at Bedford College.

ADMINISTRATIVE COMMITTEE

The administration of the courses is in the hands of a special Committee, appointed by Bedford College, on which are representatives of the College of Nursing, London, and the League of Red Cross Societies. This Committee is responsible for the admission of all students, and for the arrangement of theoretical and practical work.

The Committee is constituted as follows:

- Miss M.J. Tuke, Med. and Mod. Lang. Tripos, Cantab.,
M.A., Dublin, Principal of Bedford College, *Chairman*.
Miss Olive Baggallay, S.R.N., Health Visitor, Battersea.
J.A.H. Brincker, B.A., M.B., D.P.H., Cantab., Lecturer
in Hygiene.
Mrs. Cecil Carter, A.R.R.C., S.R.N., Chief, Division of
Nursing, League of Red Cross Societies.
Miss Cowlin, A.R.R.C., S.R.N., Educational Officer,
College of Nursing.
Miss R.E. Darbyshire, R.R.C., Matron, University College
Hospital, Educational Committee, College of Nursing.
Miss Nan Dorsey, R.N., Superintendent, 15, Manchester
Square.
Miss Edgell, D.Litt., Wales, Ph.D., University Professor
in Psychology.

The League of Red Cross Societies has a limited fund from which it assists, each year, a few Red Cross Societies to send nurses to the International Courses. Applications for these scholarships must be made by the national Red Cross Societies.

Any nurse wishing to follow either of the International Courses, who is unable to finance the course herself, should present her application to the Red Cross Society of her country.

APPLICATIONS FOR ADMISSION

Applications for admission to the courses should be made on forms provided for this purpose. These may be obtained from the headquarters of any Red Cross Society belonging to the League, from the Division of Nursing, League of Red Cross Societies, 2, Avenue Velasquez, Paris, VIII, France, or from the League of Red Cross Societies, 15, Manchester Square, London, W.1.

Applications from British nurses must be sent to the League of Red Cross Societies, 15, Manchester Square, London, W.1., and from other nurses to the Nursing Division, League of Red Cross Societies, 2, Avenue Velasquez, Paris, VIII.

The courses open August 1st and close July 15th.

REQUIREMENTS FOR ADMISSION

Applicants must be not less than 21 years of age and must forward with their applications:

A medical certificate of good general health including a statement that teeth are in good condition.

A declaration, endorsed by the Red Cross Society of the applicant's country of origin, testifying:

- a) to the good character and education of the applicant (Applicants must have had a general education corresponding to the English secondary school education with evidence of ability to profit by the course, and the best nursing training available in their countries).*
- b) that the applicant is sufficiently familiar with the English language to be able to speak, read,*

and *write* with ease and to follow lectures and take notes. The Red Cross Society endorsing her application must ensure her acquiring such familiarity before the opening of the course. (The League Secretariat can arrange, if necessary, for prospective students to spend one or two months in England for the purpose of studying English before the opening of the course. This additional expenditure will not be covered by the amount necessary for the years' course).

- c) that the applicant will be employed by her Red Cross Society or by some other public or private organization approved by that Society, to undertake, upon her return, public health nursing, or hospital administration work calculated to stimulate nursing development and raise nursing standards.

The Committee has the right, under exceptional circumstances, to admit students who do not fulfil the above requirements in all respects and to withdraw from the course any student who does not prove able to profit by it.

15. MANCHESTER SQUARE

With the establishment, in 1920, of the first course, there was a realization of the necessity for a residence where the nurses, coming from all corners of the world to study in London, could live together, discuss their common problems and build up international friendships and understanding. But it was not until April, 1924, at the third meeting of the General Council of the League, that Dr. Masarykova, of Czechoslovakia, suggested that a permanent residence be established in London, and her project was approved by the Board of Governors. A number of other countries, through their Red Cross Societies, have joined Czechoslovakia in contributing toward it. The gift of the British Red Cross was the leasehold, for six and a half years, of a house at 15, Manchester Square, London.

The house was remodelled to suit the needs of twenty-two resident students, and formally opened by the Duchess of York on June 30th, 1925.

15, Manchester Square is administered by a House Committee, meeting monthly, of which the Principal of Bedford College is Chairman, and on which are representatives of the League of Red Cross Societies and of the British Red Cross. The house is under the direct supervision of the Superintendent, member of the Nursing Division of the League of Red Cross Societies. An honorary medical advisor is in attendance.

In order that the house may be truly international, Red Cross Societies have been invited to send national art, draperies, rugs and pictures for the furnishing of the students' rooms which are then named for the donor Societies. A number of these rooms have already been so furnished.

15, Manchester Square is becoming more than a home for the students. It is taking on the significance of an international club for nurses, where foreign visitors are entertained, international lecturers are invited to speak, and a library of nursing literature from different countries is being assembled. Here a welcome is extended to all nurses from abroad visiting in London. And for the students it has the added import of a home in a foreign country, to which each of them has a claim, a home forever associated with their work, where their year of study will have broadened their tolerance and deepened their sympathies.

SPECIAL STUDY VISITS

For nurses desiring to prepare themselves for a definite and special type of work by means of study visits to different countries, the Nursing Division of the League of Red Cross Societies will undertake to plan and arrange these, and will submit an estimate of the cost. Individual needs are carefully considered and provided for with opportunities for observation, work and study.

THE INTERNATIONAL COURSE IN PUBLIC HEALTH FOR NURSES

The functions of the public health nurse are those of health education, the prevention of disease through the early recognition of symptoms and defects and bedside care of the ill.

The aim of this course is to prepare nurses for executive and teaching positions in all fields of public health nursing; i.e. visiting nursing, child welfare, school and tuberculosis nursing, pre-natal and maternity nursing under State, municipal or Red Cross authorities. It includes lectures, conferences, individual field demonstrations and excursions to centres for instruction in the practical functioning of health services.

Students from tropical countries may attend courses in tropical hygiene.

Required Subjects

Physiology is required for all British students taking the Ministry of Health Health Visitors' Examination and for those students who have not reached the required standard.

I.	Personal Hygiene and Public Health.	50 lectures.	
II.	Nutrition:	13	"
III.	Maternity and Child Welfare.	15	"
IV.	Tuberculosis	5	"
V.	Public Health Nursing.	35	"
VI.	Prevention and Relief of Distress.	30	"
VII.	Psychology: General.	35	"
	Applied.	15	"
VIII.	A Comparative Study of Some Modern Industrial Problems.	20	"

Recommended Subjects

IX.	1) Biological Introduction to Eugenics	5 lectures	
	2) Social Application of Eugenics	5	"
X.	Psychiatry	6	"
XI.	Principles of Education and Methods of Teaching	19	"

In addition to the formal lectures, much time is given to demonstrations, discussions and tuition classes. Arrangements will be made for each student to spend a short period with a public health department and to undertake health visiting under supervision. Practical work is planned for each student with reference to her past experience and future work and may include:

Experience with district nursing associations in town and country in order to obtain some insight into practical bedside nursing in the homes.

Attendance at child welfare centres, day nurseries and hospitals (enabling students to study physical conditions of numbers of infants and children, helping generally in all activities of the clinic, such as weighing, filing records and home visiting).

Attendance at a tuberculosis dispensary.

Experience in school hygiene work. Physical examination of children. Home visiting. Cleansing stations. Schools for mentally and physically defective children.

FIFTEEN, MANCHESTER SQUARE

*THE INTERNATIONAL COURSE FOR NURSE
ADMINISTRATORS AND TEACHERS IN
SCHOOLS OF NURSING*

Trends in modern nursing education indicate the need of an appreciation on the part of student nurses of the preventive as well as of the curative aspects of disease. Matrons and sister tutors are therefore finding it necessary to concern themselves with the social phases of illness and with health teaching, as well as with instruction in nursing technique and the administration of a training school.

Therefore, in 1924, the League of Red Cross Societies established at Bedford College and in conjunction with the College of Nursing, a Course for Nurse Administrators and Teachers in Schools of Nursing. Here, in addition to courses in training school administration and methods of teaching, instruction is given in the social sciences and in public health.

Through affiliation with the College of Nursing, facilities are available for instruction in the organization and administration of training schools and in methods of teaching, as well as for the study of a variety of nursing educational problems. Excellent opportunities for social studies are provided at Bedford College for Women, where students may do further work in selected fields at the discretion of the Committee.

The nurse wishing to qualify for a teaching or executive position should have a thorough preliminary and professional training. Preference will be given to nurses who already hold executive or teaching positions and who wish to study different methods of training students and directing schools.

The following course of study is typical of that arranged for the average student:

Required Subjects

XII.	History of Nursing	10	lectures
XIII.	Principles of Hospital Administration	12	"
XIV.	Training School Administration. . .	14	"
II.	Nutrition.	13	"

VII.	Psychology: general.	35 lectures
	applied.	15 "
XI.	Principles of Education and Methods of Teaching	19 "
I.	Personal Hygiene and Public Health	50 "
VI.	Prevention and Relief of Distress .	30 "

Recommended Subjects

X.	Psychiatry	6 lectures
IX.	1) Biological Introduction to Eu- genics	5 "
	2) Social Application of Eugenics	5 "
VIII.	A Comparative Study of Some Modern Industrial Problems.	20 "

Physiology may be substituted for VI upon the discretion of the Director of Social Studies.

CURRICULUM

I. **Personal Hygiene and Public Health** (50 lectures). J.A.H. Brincker, B.A., M.B., B.C., D.P.H., Cantab.

These lectures will be chiefly concerned with the standards of physiological health and efficiency; the care of the more important senses and organs of the body such as the skin in health and disease; the care of the eyesight, hearing, teeth, etc. The value of water, fresh air, sunlight and artificial radiations are also considered, as well as the necessity for health and growth of exercise, rest and sleep and the different kinds of games employed.

Consideration is given to the more important communicable diseases, including the relation of micro-organisms to disease; immunity in its relation to susceptibility and bodily resistance; vital statistics as applied to the incidence of disease; mortality and sickness figures; the principles underlying disinfection, immunization and isolation.

The course also deals with community hygiene as applied to sanitation, housing, the provision of light and air, food supplies, water supply; the provision of hospitals, clinics and treatment centres; the provision of medical and nursing help and treatment.

The hygiene of the mother and the child is studied, including maternity and child welfare schemes; care of the pre-school child; child of school age; the young adolescent; middle and old age. The care of special cases such as the blind, deaf, mentally and physically defective and the rheumatic and crippled child is also considered.

Industrial hygiene is discussed in respect to general hygienic considerations; dust of various kinds as the cause of disease and death; industrial poisons and accidents and their influence on the workers; vital statistics of occupation; industrial physiology and welfare; industrial welfare clinics.

In connexion with this course there are weekly excursions of investigation and study to places specially suited to demonstrating the subject of the lectures.

II. **Nutrition.** (13 lectures).

R.H.A. Plimmer, D.Sc., London.

Several lectures in elementary chemistry are given as an introduction to this course which deals with the composition of foods; the carbohydrates, fats and proteins, with demonstrations of tests and methods of analysis. It considers the analysis of foods; food constituents; the differences in proteins as food; digestion and assimilation of food and metabolism. The function of food; calories or fuel values; fuel requirements of men, women and children; proportion of protein, fat and carbohydrate in the diet of adults and children and mineral requirements are studied. The discussion of vitamins covers their discovery and a consideration of the absence of each vitamin from the food; effect of heat and other agents on vitamins; foods containing the different vitamins and the quantities needed; common errors in the choice of food.

III. **Maternity and Child Welfare.** (15 lectures).

Mrs H.H. Chodak Gregory, M. D., M. R. C. P.

This course deals with infant mortality and its chief causes; the rise of the maternity and child welfare movement and legislation dealing with the same; schemes of infant welfare work in towns and rural areas. The importance of pre-natal hygiene, care of the mother and the general lines of work are discussed. Infant hygiene is dealt with, including the promotion and technique of breast feeding and the restoration of failing breast milk; human milk and cows milk and their composition; milk supply and milk standards; raw, pasteurized, boiled and dried milk; methods of artificial feeding; clothing, exercise, etc. Diseases caused by insufficiency and deficiency of food, including rickets, scurvy, malnutrition are considered and infections of the alimentary tract. The development of the child up to adolescence is studied.

IV. **Tuberculosis.** (6 lectures).

S. Roodhouse Gloyne, M.D., D.P.H.

These lectures deal with tuberculosis in ancient civilizations and amongst primitive peoples; the growth of our knowledge of tuberculosis; our present-day conceptions of the disease; its infectivity; the prevalence of tuberculosis,

a disease of civilization. Morbidity and mortality rates in different countries are analysed and clinical types, "cures" and seed and soil discussed. Consideration is given to tuberculosis and industry; the phthisis industries and the dust hazard; industrial fatigue and tuberculosis; social hygiene. Individual effort; voluntary organizations; State legislation and control in the fight against tuberculosis are dealt with, as well as disinfection; individual and racial immunity; the international aspects of the disease and its prevention.

V. Public Health Nursing. (35 lectures).

Miss Olive Baggallay, S.R.N.

Miss Hester Viney, S.R.N.

Miss Nan Dorsey, R.N.

Miss Edith Smith, A.B., R.N.

This course deals with the history of public health nursing and the equipment and preparation of the public health nurse; home nursing, demonstration of the aseptic care of the nurses' equipment, and health education in the home. The problem of the expectant mother is dealt with from the point of view of home visits, classes, clinics, the management of a confinement and maternity nursing in the home. English midwifery administration and the rules of the Central Midwives Board are studied. Communicable disease nursing in the home is demonstrated and tuberculosis welfare work.

The organization and administration of a public health nursing service, municipal and voluntary, and the supervision of a public health staff are dealt with, including record-keeping, the use of records, filing and the preparation of reports.

School nursing is considered in its various aspects; its history and development; the school nurse in relation to the child's education; physical defects, their prevention, treatment and after care.

Practical and theoretical teaching of health to groups, in maternity and child welfare centres, schools and industrial womens' organizations are dealt with and the organization of classes.

Health publicity is discussed; what it is and why; the psychology, technique and methods of propaganda; posters, window displays, health fêtes and exhibits.

VI. Prevention and Relief of Distress. (30 lectures).

Mrs. Reid, M.A., Cantab.

These lectures deal with the protection afforded the individual through membership in a family or kin group in the early stages of society; the changes in the structure of the family leading up to the modern family of the present day; the growth of individual freedom and responsibility. The protection afforded by the State to the individual; the assumption by the State of various social services for the care of the individual, particularly women and children, are considered, as well as the charitable agencies for the prevention and relief of distress in various stages of society, including a modern community.

In dealing with the general principles of relief, family case work and social diagnosis are discussed.

VII. Psychology. (50 lectures).

1. General Psychology (35 lectures).

Miss B. Edgell, D.Litt., Wales, Ph.D.

a) The first part considers mental life from the genetic standpoint: native endowment; mental development.

b) The second part deals with the psychology of moral life, the growth of "the self", intentional action, conflict of motives, character, deliberation and choice. It discusses the motives and sanctions of moral conduct and considers moral standards and ideals in relation to the nurses' vocation.

2. Psychology of Infancy and Adolescence (15 lectures).

Miss V. Hazlitt, D.Litt., London.

These lectures are mainly concerned with the facts of mental growth during the two most important periods of development, infancy and adolescence. They include a detailed account of the life of the child during the first three years, showing the normal development of interest and abilities and the importance of early influences in the formation of character. The adolescent period is viewed particularly in regard to the

social problems to which it gives rise; the psychological causes of hooliganism, juvenile delinquency and various forms of individual maladjustment are discussed. Demonstrations of tests of intelligence and tests for vocational guidance and selection are given in connexion with the lectures.

3. Psychology of the Industrial Worker.

VIII. A Comparative Study of Some Modern Industrial Problems. (20 lectures).

Mrs. Williams, B.A., Manchester.

This course deals with the development and most important characteristics of the modern industrial system; the advantages and disadvantages, social and economic, of mass production; the causes of industrial unrest; trade unionism; the health of the industrial worker; welfare work and the special problems of women in industry.

Family endowment; unemployment; moral and social criticisms of the economic order; the sphere of State control and individualism versus socialism are also considered.

IX. Eugenics. (10 lectures).

1. Biological Introduction to Eugenics. (5 lectures).

J.S. Edkins, M.A., M.B., D.Sc., Cantab.

2. Social Application of Eugenics. (5 lectures).

Mrs. Reid, M.A., Cantab.

These lectures deal with the distinction between the effects of environmental and eugenic reform; racial poisons; social effects of venereal disease, of alcoholism; feeble-mindedness and the modes of social control. They also consider the habitual criminal and his treatment by segregation, lengthy or permanent; the burden of the less fit on the community; the encouragement of the more fit.

X. **Psychiatry.** (6 lectures).

Alice M. Hutchison, M.D., M.R.C.P.

This course deals with social maladjustments arising out of various forms of mental and physical disorder. The usual conception of epilepsy; the trend of modern investigation and the present position with regard to it are considered. Glandular therapy and types of deficiency; encephalitis lethargica and chorea; the uncontrollable child, including sex offenses, and the onset of habits are discussed.

XI. **Principles of Education and Methods of Teaching.** (19 lectures).

Mrs. Halsey, D.Sc.

1. In this course the principles of psychology are applied to the science of education from the point of view of the teacher and from that of the student. Methods of presenting subject matter are discussed, to find means of keeping interest and of stimulating independent thought and observation. The use of imagination is considered with respect to description, narrative and illustration. The laws of memory are applied to economical methods of learning and retaining matter, and the advantages of routine activities compared with their limitations. The importance of suggestion; imitation and sympathy affecting the influence of a teacher and the result of class work. Examinations as a test of knowledge are considered. Some conclusions derived from the experimental study of mental fatigue are dwelt upon.

The lectures are followed by practice lessons or health talks taken by individual members of the class (each lesson 30 minutes).

2. The application of these principles to the teaching of practical nursing.

In addition to the above practice lessons, arrangements are made for each student to give two lessons to a group of pupils, followed by criticism.

XII. History of Nursing. (10 lectures).

Mrs. V.H. Seymer, M.A., Oxon, S.R.N.
Miss Hallows, M.A., Oxon, S.R.N.

This course considers the evolution of nursing from the earliest age to the present day; nursing in the ancient civilizations, the pre-Christian period; the influence of Christianity, the monastic, military and secular orders; the foundation and growth of the modern nursing movement.

XIII. Principles of Hospital Administration. (12 lectures).

H.L. Eason, C.B., C.M.G., M.D., M.R.C.S., L.R.C.P.
J.G. Porter Phillips, M.D., M.R.C.S., L.R.C.P.
A.L. Baly, Esq., L.R.C.P., M.R.C.S.
T.H. Woodfield, Esq., M.D., D.P.H., L.R.C.P.,
M.R.C.S.

This course deals with the organization and administration of voluntary and State hospitals, their constitution, relation to the community, personnel and department management; sources of income and control of expenditure; purchase and supervision of supplies and equipment in all departments.

The social service department and its relationship with other existing social service organizations are also studied.

In connexion with this course, visits are paid to different types of hospitals, and with each visit a special lecture is given by the Superintendent in charge of the hospital.

XIV. Training School Administration. (12 lectures).

Miss Musson, S.R.N., R.R.C.
Miss Cockrell, S.R.N., R.R.C.

This course deals with the various authorities under which training schools are carried on; hospital training schools; private training schools; university schools of nursing. The administration of a preliminary training school; the selection of candidates; ethics; the curriculum and class-room equipment; records and reports are discussed.

Ten visits of observation to hospitals and training schools are organized in connexion with this course.

THE COLLEGE OF NURSING

INTERNATIONALS

First International Course, 1920-21

Elsa Anderson (P.H.)	Sweden.
Jean Browne (P.H.).	Canada.
Theophanie Body (P.H.).	Serbia.
Marie Chludzinska (P.H.).	Poland.
Helen Hiriakoff (P.H.).	Russia.
Anna Hanakova (née Nemcova) (P.H.).	Czechoslovakia.

Julia Molnarova (P.H.)	Czechoslovakia.
Katherine de Osztoids (P.H.)	Hungary.
Maria de Steller (P.H.)	Hungary.
Pepina Wolfbauer (P.H.)	Austria.

Fifth International Course, 1924-25

Harriet Baud (H.A.)	Netherlands.
Maria Candia (P.H.)	Paraguay.
Doris Christian (P.H.)	New Zealand.
Marina Diomede (P.H.)	Greece.
Margaret Farquhar (H.A.)	Great Britain.
Joza Filipova (H.A.)	Czechoslovakia.
Gerda von Freyhold (P.H.)	Germany.

Bertha Funke (P.H.)	Austria.
Lucy Gough (P.H.)	Great Britain.
Hildur Hvoslef (H.A.)	Norway.
Gabrielle Kaeckenbeck (P.H.)	Belgium.
Katina Karava (H.A.)	Greece.
Ann Kirkpatrick (P.H.)	New Zealand.
Dora Koch (P.H.)	Switzerland.
Justine Kushke (H.A.)	Latvia.
Samran Lavasandha (P.H.)	Siam.
Janet Moore (H.A.)	New Zealand.

Sixth International Course, 1925-26

Gladys Marguerite Bowes (H.A.)	Great Britain.
Eleanor Mary Brinton (P.H.)	Great Britain.
Maj-Lis Edgren (H.A.)	Finland.
Lonna Fellner (P.H.)	Austria.
Hilda Adelaide Fletcher (P.H.)	United States.
Margarete Hübler (P.H.)	Germany.
Krishnabai Tambay (Kanetkar) P. H.	India.
Winifred Eaton (née Knox) (P.H.)	South Africa.
Mary Mochnacka (P.H.)	Poland.
Konstanza Rabitsch (P.H.)	Austria.
Alice Sher (P.H.)	Latvia.
Marta Anna Sindlerova (P.H.)	Czechoslovakia.
Kristin Olina Thorodssen (P.H.)	Iceland.
Margaret Tsakova (P.H.)	Bulgaria.
Marie Alexandrine von Wacker (H.A.)	Hungary.
Hermione Whitehead (P.H.)	Great Britain.

Seventh International Course, 1926-27

Marjorie Craven (H.A.)	Great Britain.
Despina Cantacuzino (H.A.)	Roumania.
Gertrude Davies (P.H.)	Great Britain.
Elizabeth Dyson (P.H.)	Great Britain.
Martha Hededam (H.A.)	Denmark.
Clothilde Hennebert (P.H.)	France.
Miliza Kipper (P.H.)	Estonia.
Marianne Kutschera (P.H.)	Austria.
Anna Mankova (P.H.)	Czechoslovakia.
Mercedes Mila (H.A.)	Spain.
Isabel Manson (P.H.)	Canada.

Stephanja Potocka (H.A.)	Poland.
Gisela Rapatz (P.H.)	Austria.
Anna Schwarzenberg (H.A.)	Austria.
Grete Sonnenberg (H.A.)	Austria.
Adelaide Spensley (P.H.)	South Africa.
Marie Stephan (P.H.)	Germany.
Marie Strobl (H.A.)	Austria.
Maria Wagner (P.H.)	Austria.

*Special Students**

Itta Frascara (1922-23).	Italy.
Rosa Rabello (1922-23).	Brazil.
Rosa Hellich (1923-24).	Serbia.
Maria Lisboa (1923-24).	Brazil.
Nikitza Bovolini (1924-25)	Serbia.
Theodorina Petrova (1924-25).	Bulgaria.

* Bedford College course not followed.

BOARD OF GOVERNORS

The Board of Governors is composed of one representative of each national Red Cross Society within the League.

Hon. John Barton PAYNE, *American Red Cross (Chairman)*; Dr. Julio R. GARINO, *Argentine Red Cross*; Viscountess NOVAR, *Australian Red Cross*; Dr. Karl HELLY, *Austrian Red Cross*; Prof. Pierre NOLF, *Belgian Red Cross*; H. E. Marshal Ferreira do AMARAL, *Brazilian Red Cross*; Hon. Sir Arthur STANLEY, *British Red Cross*; H. E. M. DANEFF, *Bulgarian Red Cross*; Dr. James W. ROBERTSON, *Canadian Red Cross*; H. E. Don A. Armando QUEZADA, *Chilian Red Cross*; H. E. the Marquis de PEBALTA, *Costa Rican Red Cross*; Señor Enrique J. CONILL, *Cuban Red Cross (Vice-Chairman)*; Professor Luis F. EXECUTIVE COMMITTEE

The Executive Committee is composed of the Chairman and three Vice-Chairman of the Board of Governors, and of the present representatives on the Board of the British, Colombian, Czechoslovak, French, Greek and Italian Red Cross Societies.

FINANCE COMMITTEE

The Finance Committee is at present composed of the representatives on the Board of Governors of the Mexican, Netherlands, Serbo-Croato-Slovene and Siamese Red Cross Societies.

BOARD OF ADVISORS

At the meeting of the Board of Governors in May, 1927, it was decided to form a Board of Advisors to take the place of the former Medical Advisory and Nursing Advisory Boards. The Board of Advisors will be composed of experts in the various branches of the Red Cross peacetime programme. The names of members of this Board will be published as the nominations are made.
