Miss P. Sayer,  
Senior Education Officer,  
English National Board for Nursing,  
Midwifery and Health Visiting,  
Victory House,  
170 Tottenham Court Road,  
London W1P 0HA.

Dear Miss Sayer,

Thank you very much for your letter (17/10/PS/SK) of 12th July. Yes, you guessed it, I am greatly relieved at the outcome of the maternity care module and I am pleased to read that the objectives of the experience - the care of children - is satisfactory. This leaves me, as I understand it, to deal with the objectives of the community and psychiatric modules to take place in the Spring term of 1984.

My Principal has asked me to compile a series of statistics on undergraduate nursing courses. In particular, I would like to learn how many nurses, since the inauguration of those courses, have graduated from the nursing undergraduate courses. Would it be possible for you to tell me who to contact so that I can obtain this information.

With best wishes,

Yours sincerely,

Marion Ferguson,  
Director of Nursing Studies.

Dear Mrs Ferguson,

Thank you for your letter of June 30th concerning experience for the undergraduates in maternity care and care of children.

You must be somewhat relieved that the former Central Midwives Board has finally agreed proposals for the maternity care module.

The objectives for the period of experience in the care of children are satisfactory. The involvement of the Charles West School of Nursing in this module has been noted.

With all good wishes.

Yours sincerely,

P SAYER (MISS)  
Senior Education Officer
