HAMMERS,
NORTHWOOD,
MIDDLESEXJan 2nd 1922.

My dear Miss Luke,

I must apologise
for bothering you about College
affairs during the vacation
but I had a note from Mrs Thomas,
secretary to the Almoners Council,
asking me if I would give a
course of about ten lectures on
hygiene to their students -
I wrote to her to tell her that
I could do nothing except
through the College & that

I should also have to find out what work it would involve as I am not a hygienist - I find from Helen Allen that what they want is really Applied Physiology not Hygiene, in fact they really want me to repeat a course I gave for Anatomists about two or three years ago.

I have all those notes so that it would not involve much extra labour to me

if the college is willing
for me to undertake the course.

With best wishes for 1922 &
again many apologies for
bothering you

Yours affectionately

Horace Idkiss.
