

ETHNICITY

"Post-war immigration has transformed Britain into a multi-ethnic society". Discuss.

(Describe and account for the pattern of post-war immigration; what does 'ethnicity' mean? what is its relation to the idea of 'race'? were there ethnic differences in Britain previously? which are the main ethnic minorities in Britain today, and what are their distinctive characteristics? Will Britain remain 'multi-ethnic'? what are the implications for nursing and health care generally?)
