

# Share and share alike

Systems considerations for  
patron driven acquisition in a  
consortium

# Elements of the discovery process

- Initial load of candidate records
- Updates if additions or removals of content made in the collection
- Removal of candidate records at close
- Maintenance of high-quality records for permanent additions

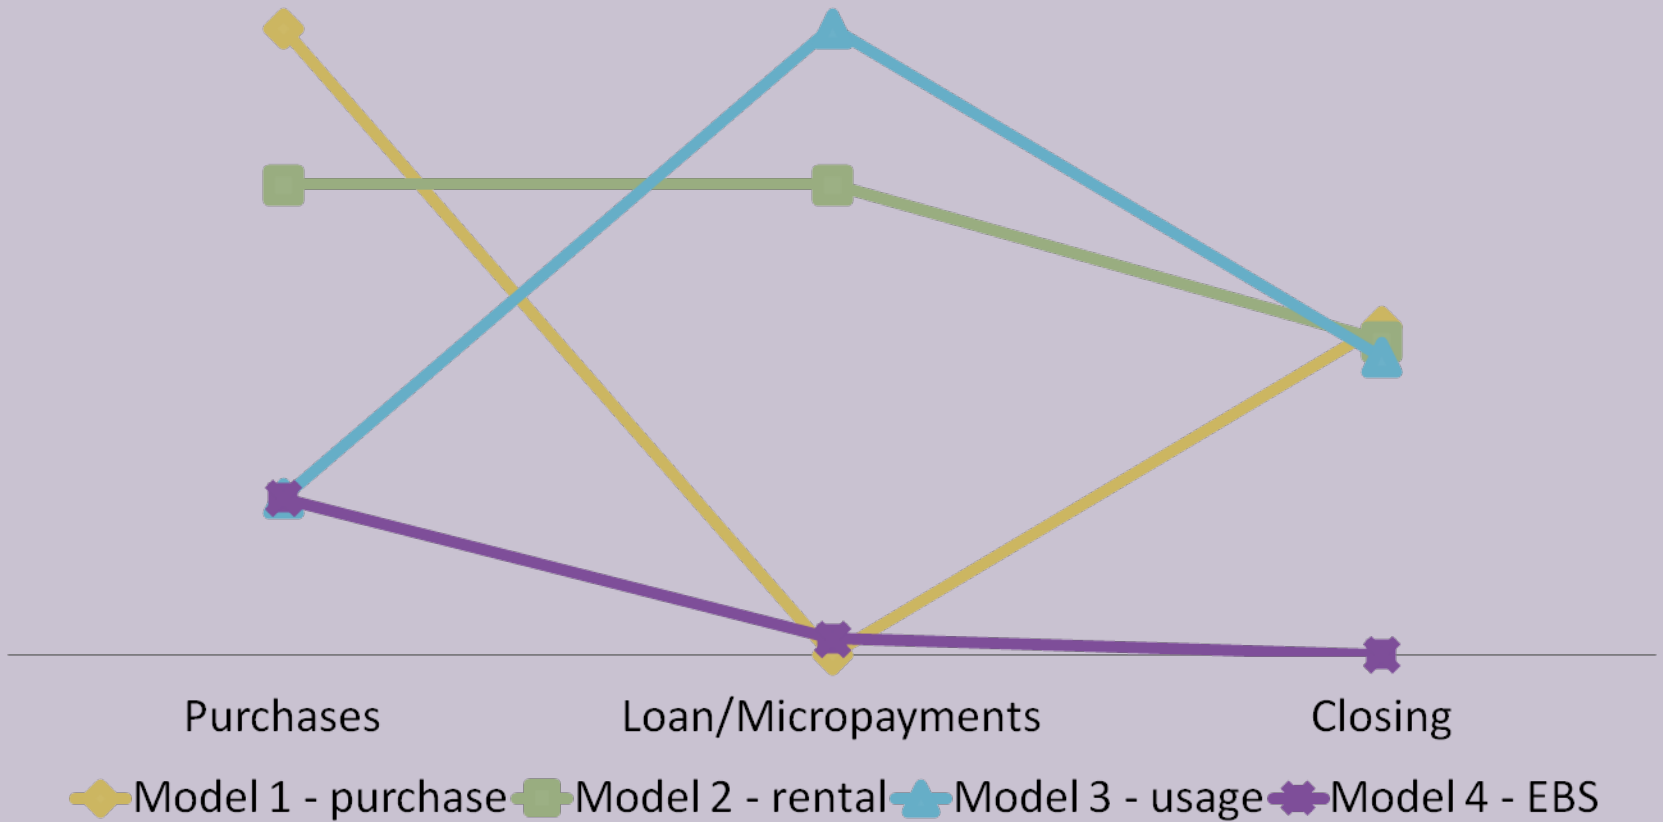

# Discovery work

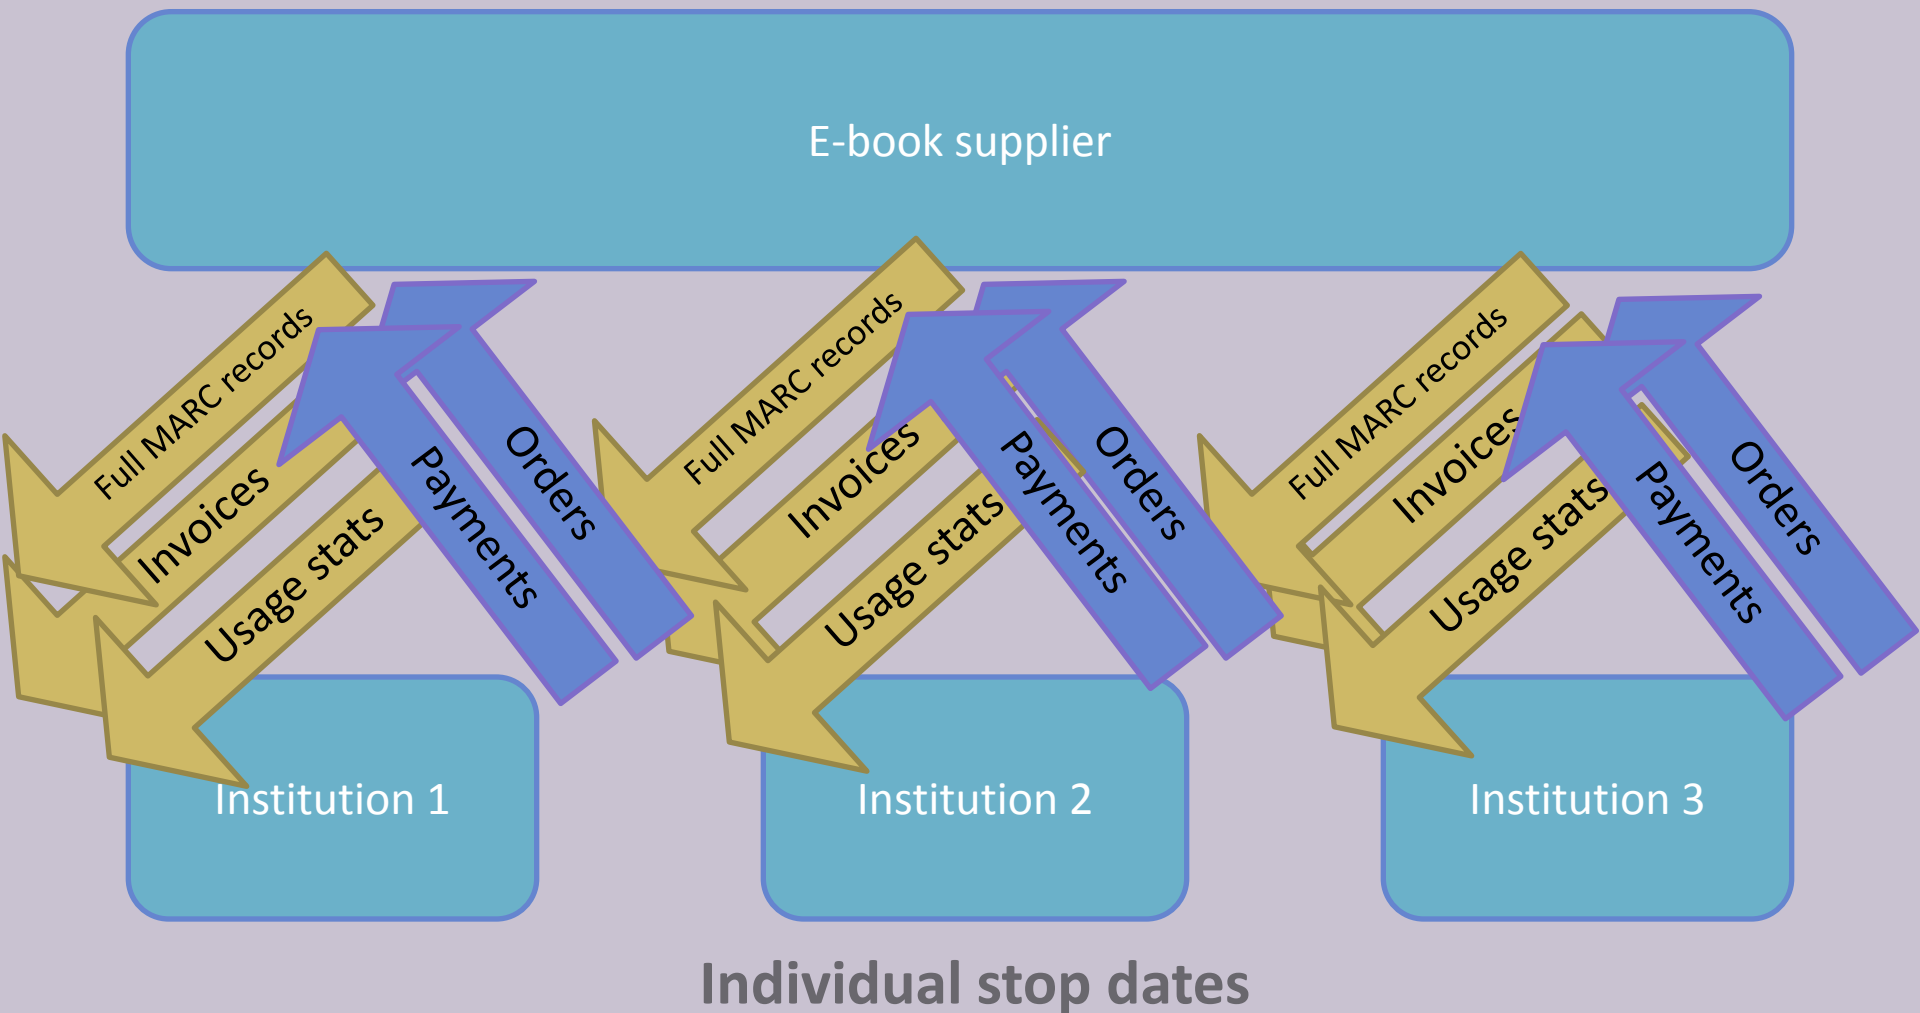

# Available methods

- MARC records in LMS
- MARC records in discovery service
- Knowledge base and link resolver
- Native interface searching

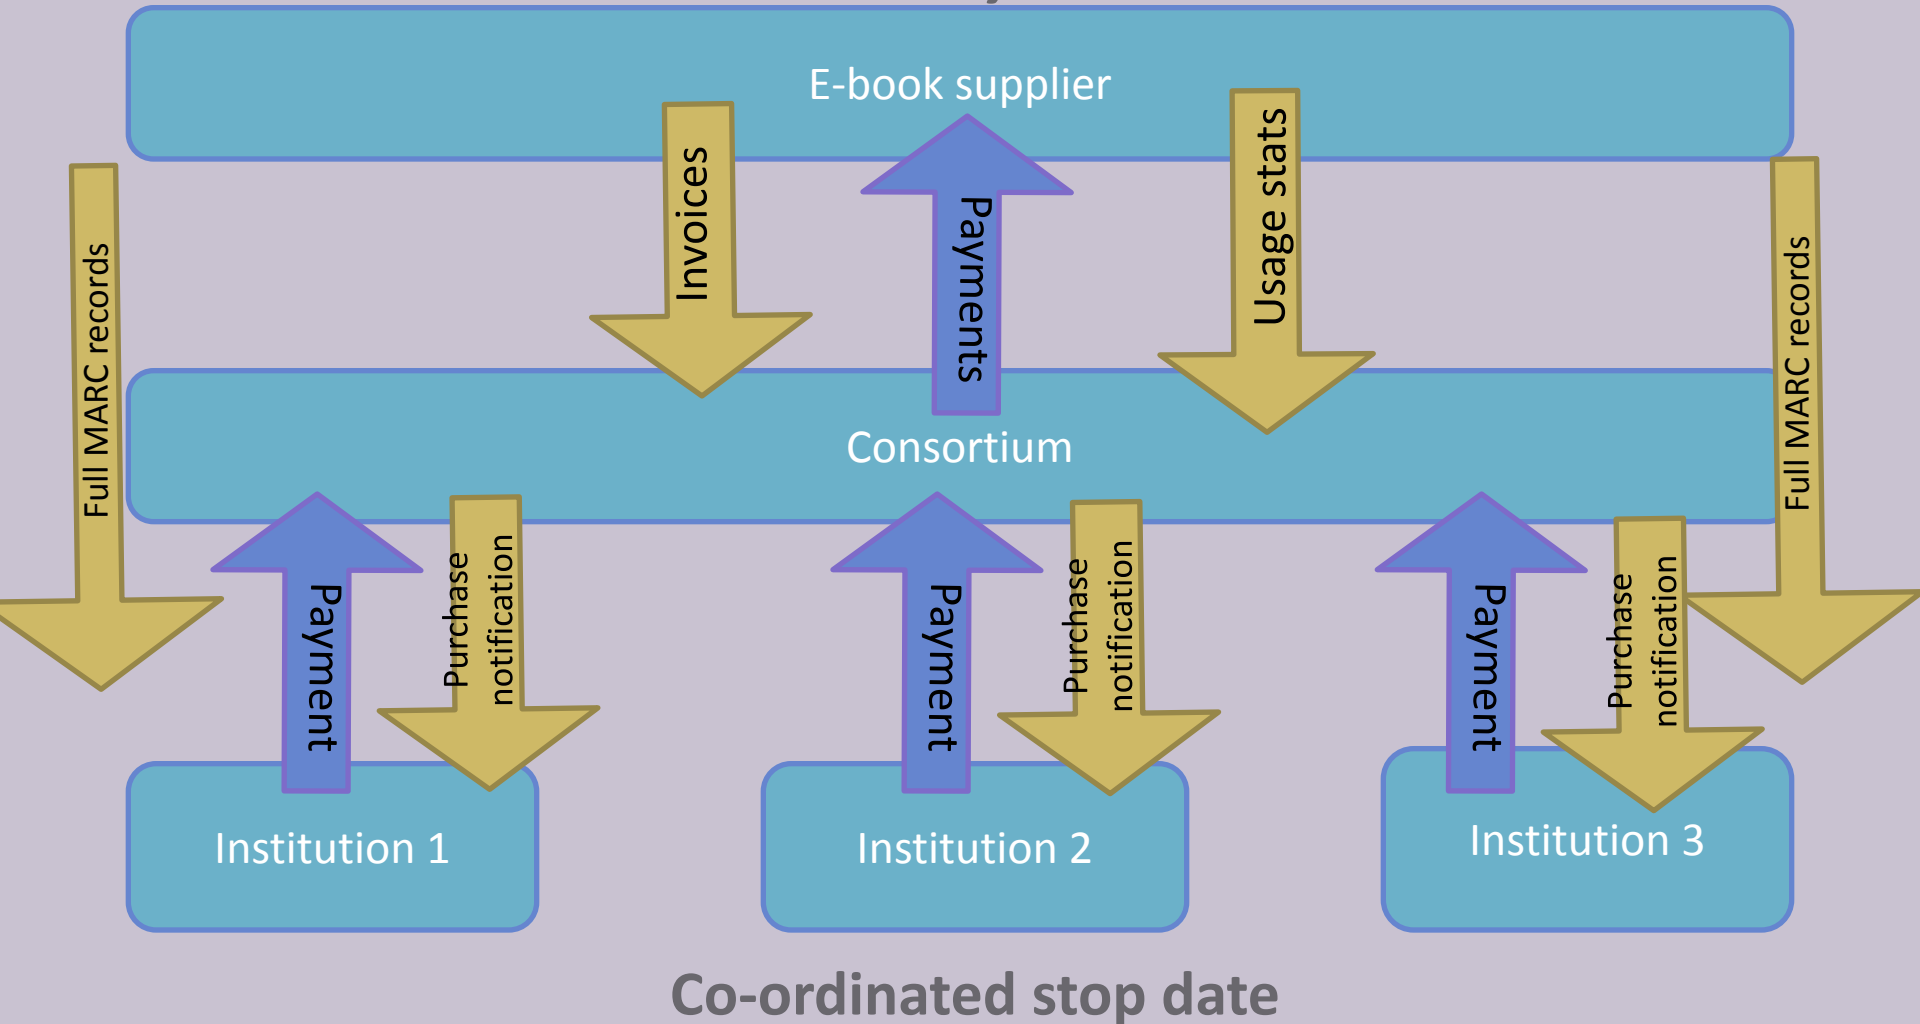

# Financial work

# Finances as individual institutions models 1,2 and 3

# Finances as consortium models 1,2 and 3

# Points for consideration

## Institution

- Which method for discovery
- Frequency of updates if appropriate
- Closing – removal of candidate records and maintenance of high quality ones for purchased material
- Financial tracking

## Consortium

- Ensuring system parity
- Centralising financial management – staff and systems
- Monitoring usage and co-ordinating a close
