

December 1st 1913.

Dear Dr. Brincker,

The Principal asks me to send the enclosed copy of the Report of the Hygiene Committee. When she came to look over my copy of the minutes she thought that there had been a slight omission on page 2, where under the 3rd section, part 11, she thought it had not been intended to omit Geology as an optional subject, and on page 3 under Michaelmas or 4th term, she thought it had been intended to allot 2 hours a week to Economics, instead of 1, as my notes had it.

I expect the variations are due to our copying and not to any error in the minutes.

I am,

Yours very truly,

Secretary of Council.
