Jan 19th 1922.....19.....

Dear Miss Tuke,

Thank you for your letter of the 9th. I have arranged with Mrs Edkins for a course of ten or twelve lectures on Wednesdays at 10a.m. beginning on the 25th. In notification I have of course as you desired styled them "Applied Physiology"

The present students will only have time for a short course covering this one(Lent) term. Most of them will have completed their training with us before the summer and as they have already had some teaching in physiology last year We think that the short course should suffice for them.

I quite realise that you may wish to consider the whole question before we can come to any arrangement about the students who will need to begin a course of some sort next autumn.

I feel sure that your suggestion of a fee of 2½ guineas for each student for this term's course will be quite acceptable to my Committee and I will ask the Hon. Treasurer to send a cheque shortly.

Yours truly,

*W. Thomas*
