

REPORT ON HYGIENE COURSE.

April 30th, 1908.

The Hygiene Committee met on Wednesday, April 28th for further consideration of the Report, referred back to them by the Board of Education.

The Report was adopted in the form attached, with the alterations which are marked in red ink.

With regard to the arrangement of the Course (1), the opinion was held by three out of seven of the members present at the final meeting of the Committee that the time devoted to Physics was not commensurate with that given to other subjects demanded in qualifying for any of the posts towards which the Hygiene Course specially leads. The same view was known to be held by at least one member who was not able to be present on that day. It was the desire of these members that these views should be expressed at the Board of Education.
