

BEDFORD COLLEGE  
(UNIVERSITY OF LONDON)

MEMORANDUM

To: The Secretary,  
From: Marion Ferguson.

25 July 82

Insurance for Nursing Studies Students.

Thank you very much for the information on the insurance cover for nursing students.

As to the first point which related to honorary contracts issued by the hospital, it is precisely because the working of such contracts in no way fits our students that we were not able to issue our students with them. The students are on the premises of the hospital at varying times, with duties and working conditions relating to them as students and in no way as employees. They are not subject to employment regulations in terms of having to give minimum periods of notice etc.

It was because of the inapplicability of this document that I approached you about possibly finding a way to ensure our students are covered under the notion of vicarious responsibility.

If you wish, we perhaps should have another discussion about this, and I shall be in London on the 20th August. Perhaps you would let me know if you will be free then.
