Recd 2/1/22

Dear Madam,

We are anxious to know if it would be possible to arrange with you for Mrs Edkins to give our students a course of lectures on Hygiene during the coming term.

You may remember that some years ago Mrs Edkins gave a series of lectures for us and we have never found any lecturer as much appreciated as she was. I did not hear until last week that she was working with you again.

Our present ~~year~~ students had last term a short course of lectures on Physiology so that for them it is hygiene only that is required for the moment- of the not too technical nature, which point Mrs Edkins understood so well.

If however you should feel able to agree to such an arrangement we should be very glad if next autumn Mrs Edkins could give a combined course- coverings two terms- on applied Physiology and Hygiene as she used to do, for the 1922 students

If you should be willing and able to arrange the Hygiene course for this term should you think that twenty guineas was a suitable fee for ten or twelve lectures? There will be eight students and that is the sum which we have paid recently for such a course

Yours faithfully,

Mary W. Thomas  
Hon. Sec.

Miss Tuke
