Miss F. E. Hardy	Mrs. E. A. Warren

THE COLLEGE OF NURSING

(Incorporated by Royal Charter.)

Department of Education.

AIMS OF THE DEPARTMENT

The aim of the Department is to provide post-graduate lectures and courses of study in every branch of nursing, to improve methods of teaching, and to educate leaders for posts of responsibility, either in Schools of Nursing or in any public field in which the services of trained nurses are needed.

The College of Nursing works in close co-operation with the leading Schools of Nursing in the country and two of the Women's Colleges of the University of London.

HISTORY OF THE DEPARTMENT

In 1918 a course for Sister Tutors was established at King's College of Household and Social Science, University of London, and four years later, at the request of the League of Red Cross Societies, a course for Nurse Administrators and Teachers in Schools of Nursing was arranged at Bedford College for Women, in conjunction with the College of Nursing.

In 1925 a further development took place, when the College of Nursing was approved by the Ministry of Health as a centre for the training of Health Visitors.

In 1926 the University of London established a Diploma in Nursing, and additional courses of lectures were arranged by the College of Nursing to meet the needs of nurses preparing for this examination.

In 1930, at the request of the Central Midwives' Board, and in co-operation with the Midwives' Institute, a special course of instruction was arranged in preparation for the Midwife Teachers' Examination.

A Post Graduate Week for Public Health Nurses and a Study Week in General Nursing are held annually. Lectures, demonstrations and visits of observation are arranged, which provide an excellent opportunity for helping nurses to keep up to date in the various branches of their professional work.

THE LIBRARY OF NURSING

This was established in 1921, with the assistance of a grant from the Carnegie United Kingdom Trust, as a borrowing and reference library, to serve as the Nursing Branch of the Central Library for Students, and is open without subscription to all Nurses. Books are posted to all parts of the United Kingdom, the borrower's only expense being postage.

Individual borrowers may have three books, and must renew them at the end of one month; group borrowers (at least ten persons) may have ten books at a time, and must renew them at the end of two months.

The Library is open :—

Tuesday and Friday	9.30 a.m. to 8 p.m.
Other Week Days, including the first Saturday of the Month... ..	9.30 a.m. to 4.45 p.m.
Other Saturdays	9.30 a.m. to 12.45 p.m.

SCHOLARSHIPS

Two Scholarships endowed by Lady Cowdray, and valued at £135 each, are awarded annually by the College of Nursing to enable its members to undertake the Sister Tutors' course at King's College of Household and Social Science, University of London.

From time to time other Scholarships are offered by the College and its Branches to those members who wish to qualify as Health Visitors, Midwives, or to undertake some special course of post-graduate study.

A competitive examination is conducted by the College of Nursing in connection with the award of Scholarships offered by the College or its Branches. Examination fee 5s. (not returnable).

ELLEN SARAH FOUNTAIN FUND

A grant of £10 is made annually to a member of the College of Nursing who, having been trained at one of the following hospitals :—

The Lambeth Hospital ;

The Dreadnought Hospital, Greenwich ;

The Brompton Hospital for Consumption, in affiliation with a General Hospital Training School,

undertakes to pursue an approved course of post-graduate study.

COLLEGE LOAN FUND

Members of the College may borrow money at a low rate of interest from this fund, returnable within three years, for the purpose of post-graduate study or for professional purposes.

FEES

All fees, either for a course of study or for separate lectures, are payable in advance. The fee for the six months' full-time course of training for Health Visitors may be paid in two equal instalments.

COURSES OF STUDY.

COURSE OF TRAINING FOR HEALTH VISITORS

Approved by the Ministry of Health.

This course is of six months' duration and is open to a nurse who has completed a three years' course of training in a hospital which was during the period of her training, or which has subsequently become, a training school approved by the General Nursing Council for England and Wales, the General Nursing Council for Scotland, or the Joint Nursing and Midwives' Council for Northern Ireland, for the purpose of admission to the general part of the Council's register.

Candidates should hold the certificate of the Central Midwives Board, but may enter for the course of training for Health Visitors provided they declare in writing their intention of obtaining that Certificate. The Health Visitor's Certificate approved by the Ministry of Health is not granted to the successful candidates until they become Certified Midwives.

(Prospective Health Visitors are eligible for a grant of £20 from the Ministry of Health in respect of Midwifery training.)

All candidates will be required to furnish evidence of a good general education, and the Council of the College reserves the right to refuse any applications for this Course of Training.

The Course is held twice yearly, starting at the end of September and the beginning of January.

All applicants will be on four weeks' probation, and will be advised to discontinue their studies if considered unsuitable for the training. Candidates are expected to be regular in their attendance at lectures and demonstrations.

Fee—£25 10s. for the Course.

For students eligible for the grant from the Ministry of Health (Memo. 101 M.C.W.), this fee is reduced by £15.

Maximum age of students upon entering Course who are eligible for a Ministry of Health grant—35 years, or such later age as the Council of the College may, with the consent of the Minister of Health, approve in any individual case.

Fees may be paid in two instalments and are not returnable, but a Candidate who accepts the advice of the Council to discontinue her studies will not be required to pay the second instalment.

Candidates will enter for the examination approved by the Ministry of Health, for which the Royal Sanitary Institute is the Central Examining Body.

Examination Fee—£4 4s.

The Cost of Board and Accommodation must be met by the Candidate, and a list of Hostels and Addresses for Residence is issued by the College of Nursing.

Syllabus

*Hygiene and Public Health (including Sanitary Law);
 Anatomy and Physiology;
 Communicable Diseases;
 Maternity and Child Welfare, including Hygiene of Married Life;
 School Hygiene;
 Elementary Economics and Industrial Conditions;
 Methods of Teaching Health (Lectures and Practical Classes);
 Social Administration;
 Nutrition and Domestic Economy;
 Tuberculosis;
 Venereal Disease.

Practical experience includes

Maternity and Child Welfare in all its Branches;
 Health Visiting;
 Attendance at Clinics for the Treatment of—
 Tuberculosis;
 Venereal Disease;
 Ophthalmia Neonatorum;
 District Nursing with Queen's Institute of District Nursing;
 Social Work at one of the Settlements;
 School Medical Service—including visits to special schools and school clinics.
 *Visits of observation are arranged in connection with the lectures in Hygiene and Public Health.

DIPLOMA IN NURSING—UNIVERSITY OF LONDON

The College arranges special courses of study for candidates preparing for this examination, which include instruction in Elementary Chemistry and Physics, Anatomy, Histology, Physiology, Bacteriology, Hygiene, Public Health, Psychology, History of Nursing, Principles of Education, Hospital and Training School Administration.

With the kind co-operation of the leading training schools and of the special hospitals, practical post-graduate work can be arranged by the College of Nursing for those preparing for Part B of the examination.

Coaching for the State Examinations.

Under certain conditions, special coaching for the State Examinations is offered, either in classes or by correspondence. Tuition for the Preliminary Examination is undertaken only in the case of those candidates who failed to register during the period of grace.

POSTAL COURSES

*For Existing Health Visitors. 10 Lessons. Fee—£3 10s. College Members

This course includes instruction in:—

Anatomy and Physiology ;
Hygiene ;
Nutrition ;
Vital Statistics ;
Sanitary Law.

£ 3 15s. Non " "

Anatomy and Histology. 12 Lessons.

Fee—£1 15s. for College Members
£2 for Non-Members

Physiology. 12 Lessons.

Fee—£1 15s. for College Members
£2 for Non-Members

} Combined course,
£3 for College
Members
£3 10s. for Non-
Members

History of Nursing. 12 Lessons.

Fee—£1 15s. for College Members
£2 for Non-Members.

Elementary Physics and Chemistry. 18 Lessons.

Fee—£2 15s. for College Members.
£3 for Non-Members.

Psychology. 16 Lessons. Fee—£3 10s. for College Members.
£3 15s. for Non-Members.

Hygiene. 10 Lessons. Fee—£1 10s. for College Members.
£1 15s. for Non-Members.

Bacteriology. 6 Lessons. Fee—£1 for College Members.
£1 5s. for Non-Members.

State Examination Postal Tuition.

(a) Full Course. Preliminary and Final Examination £7.

(b) Final Examination £5 5s.

(c) Single Subjects £1 15s. (offered only to candidates who have failed in a single subject at a previous examination).

Students are expected to undertake a definite course of reading—explanatory notes are sent with each lesson and test papers returned to the students with the necessary corrections and comments.

*Intended primarily for those who by reason of three years' satisfactory service as whole-time Health Visitors are eligible to enter for the examination approved by the Ministry of Health.

LIST OF LECTURES.

*MATERNITY AND CHILD WELFARE, INCLUDING HYGIENE OF MARRIED LIFE. 12 Lectures.

Administration. Maternal and infant mortality. Schemes for maternal and child welfare. Health Visiting. The Midwifery Service. Antenatal hygiene. Maternal care. Infant and child hygiene. Breastfeeding. Artificial feeding. General management of infants and young children. Common disorders and ailments of childhood. Ophthalmia neonatorum.

‡†*HYGIENE AND SANITATION. 12 Lectures.

Personal Hygiene. Clothing. The necessity of exercise, rest and sleep for health. Postural defects. The value of fresh air, sunlight and artificial radiation. Importance of cleanliness. Care of the skin in health and disease. Bathing. Care of the mouth, nose, eyes, ears, feet, hands and hair. Habit formation.

Domestic Hygiene, and Sanitation. Composition of air. Principles and methods of ventilation. Site and aspect of dwellings. Open spaces and playing fields. General sanitary construction. Heating and lighting. Water supply. House drainage and sanitary fittings. Disposal of refuse and sewage. Disinfection. Insect vectors of disease.

‡†*PUBLIC HEALTH. 11 Lectures.

Public Health. Administration in England and Wales. Local Authorities. The Local Government Act, 1929. The Laws and Public Health Acts concerning nuisances. Housing and Town Planning. Legislation dealing with the adulteration, contamination and protection of foods. Milk—standards, designations and legislation. Industrial hygiene and occupational diseases. Nursing Homes Registration Act. Maternity and Child Welfare Acts. Midwives Acts. Rules of the Central Midwives Board. Children Act, 1908. The powers of the local authority for cleansing of verminous persons and premises. Vital statistics.

*SCHOOL HYGIENE. 6 Lectures.

History and organisation of the School Medical Service. Principal legal measures affecting the school child. Medical inspection and treatment of school children. Education and treatment of Defective Children. Control of Infectious Disease in Schools. School premises.

†*FACTORY AND SHOPS LEGISLATION. 6 Lectures.

Trade Boards and Legal Wages. Unemployment Insurance.

†*SOCIAL CONDITIONS AND SOCIAL ADMINISTRATION. 10 Lectures (at Bedford College for Women).

Care of the mentally defective. Mental Treatment Act and its relation to the Lunacy Acts. The Children Act. Home Office Schools. Probation. Clubs for children and adolescents. Adoption of children. Guardianship of Children Act. Social Insurance. The National Health Insurance Act. Widows and orphans and old age pension. Workman's Compensation Act. Provision for the welfare of the blind. Principles of relief. Voluntary Agencies. Thrift and National Savings Scheme. Legitimacy Act. Divorce, separation and affiliation orders.

***COMMUNICABLE DISEASES. 8 Lectures.**

Sources of Infection. Modes of Transference. Prevention of Infection. Notification. Immunity and Investigation. Inoculation. General Sanitary Measures: Personal Hygiene. History: signs, symptoms, treatment, complications and Public Health importance of the principal communicable diseases.

***TUBERCULOSIS. 6 Lectures.**

Historical introduction. The Tubercle Bacillus and its different types. Predisposition and susceptibility. Heredity. The classification of Tuberculous disease. Modern theories of treatment. Theories of Infection. Tuberculosis Statistics. Sociological types and age groups. Regional Surveys. Housing and overcrowding. The Tuberculosis ridden industries. Fatigue and factory conditions in relation to Tuberculosis. Notification of Tuberculosis. State Schemes for the Treatment and Prevention of Tuberculosis. Employment of the Tuberculous. Disinfection. Education of the Patient and Anti-Tuberculosis Propaganda.

‡*VENEREAL DISEASES. 4 Lectures.

Relative Incidence of the three main Venereal Diseases. Syphilis: short history, ætiology, effects on tissues, general course. Particular effects in pregnancy and on offspring. General Treatment; treatment in pregnancy.

Congenital Syphilis: Tests of Cure.

Gonorrhœa: ætiology; general course. Complications affecting women. Effects of gonorrhœa on pregnancy and on the puerperium. Effect on new born infants. Treatment of gonorrhœa in adults. Gonorrhœa in children. Prevention and treatment. Tests of Cure. Public Health measures for the Control of Venereal Diseases.

***PSYCHIATRY. 6 Lectures.**

Outlines of Psychology. Reaction between Child and Environment. Child and Parental Reactions. Delinquency. Evolution of Sex Life. Bad Habits in Children.

†*NUTRITION. 8 Lectures.

The Aims and Methods of the study of Nutrition. Composition of Foods—Proteins, Carbohydrates and Fats. Mineral salts and water. The Vitamins. Fat-soluble vitamins A and E and water-soluble vitamins B and C. The calcifying vitamin D in relation to the formation of the Bones and Teeth.

Quantitive Food Requirements and Methods for their calculation. Ante-natal and child feeding. Feeding of the normal adult.

Modifications of the normal diet in diseased conditions.

In connection with this course, special classes are arranged to deal with Comparative Costs, Family Budgets, Simple Theory of Cookery, Study of Equipment, and Marketing. Home Laundering.

‡*APPLIED ANATOMY AND PHYSIOLOGY. 12 Lectures.

Anatomy: Osseous System. Muscular System. Circulatory System. Lymphatic System. Respiratory System. Digestive, Absorptive and Excretory Systems. Reproductive System. Nervous System. Organs of Special Sense.

Physiology: Composition and Properties of Blood. Circulation. Respiration. Digestion. Metabolism. Excretion. Heat Regulation. Functions of Nervous System. Special Senses. Endocrine Glands. Reproduction.

Four extra Lectures on the reproducing tract are arranged to cover the Syllabus of the Midwife Teachers' Examination.

***METHODS OF HEALTH EDUCATION, WITH STUDENTS' PRACTICE CLASSES. 4 Lectures followed by Practice Classes.**

The Teaching Function of the Health Visitor. The Learning Process. Methods of Teaching. Application to Health Education. Preparation of Material for Different Occasions—adults and children, individually and in groups. Methods of interesting the general public.

†PRINCIPLES OF HOSPITAL ADMINISTRATION. 10 Lectures.

The organisation and administration of Voluntary and State Hospitals, their constitution, relation to the community, personnel, and department management. Sources of income and control of expenditure. Purchase and supervision of supplies and equipment in all departments.

†PRINCIPLES OF TRAINING SCHOOL ADMINISTRATION. 20 Lectures.

Types of training schools and the various authorities responsible for their administration. Procedure of meetings.

Legislation. The General Nursing Council. Professional Organisations.

The Matron's duties. Routine work of the Matron's Office, correspondence, reports, records. Ward visiting and inspection of hospital buildings. Selection of Probationers. General arrangement of work. Curriculum. Preliminary training schools. Classroom equipment. 'The Nurses' Home.

Duties of Assistant Matron, Home Sister, Sister Tutors, Night Sister, Ward Sisters.

Careers for Nurses. Private Nursing.

Management of special departments. Supervision of the domestic staff; daily workers. Insurance. Dietaries; staff and patients. The management of the kitchen, the store-room, laundry and linen room. Inventories.

In connection with the courses of lectures in Hospital and Training School Administration visits of observation are arranged to various types of hospitals.

†HISTORY OF NURSING. 12 Lectures.

Evolution of nursing from the earliest age to the present day, including nursing in the ancient civilisations. Pre-Christian period. Influence of Christianity; the monastic, military and secular orders. Foundation and growth of the modern nursing movement. Legislation. Professional organisations. Recent developments and opportunities.

††PRINCIPLES OF EDUCATION AND METHODS OF TEACHING, INCLUDING DEMONSTRATIONS AND PRACTICE LESSONS. 14 Lectures.

Application of principles of psychology to the science of teaching. Problem of attention and the means by which interest can be maintained. Use of imagination in descriptive parts of a lesson. Illustration. Economical methods of learning and the factors on which

memory depends. Some advantages and limitations of routine activities. The teacher's personality and the use of suggestion and sympathy. Methods of preparing notes for lectures and lessons. The problem of fatigue. Testing of knowledge by examination. Educational programme of a training school for nurses.

†ANATOMY AND HISTOLOGY. 12 Lectures.

Anatomy—Osseous system. Muscular system. Circulatory system. Lymphatic system. Respiratory system. Digestive, absorptive, and excretory systems. Reproductive system. Nervous system. Organs of special sense.

Histology—Microscopic structure of cells, tissues, and organs of body.

†PHYSIOLOGY. 12 Lectures.

Composition and properties of blood. Circulation. Respiration. Digestion. Metabolism. Excretion. Heat regulation. Functions of nervous system. Special senses. Endocrine glands.

‡†ELEMENTARY BACTERIOLOGY. 10 Lectures.

Microscope and its use. Micro-organisms in foods, water, sewage. Germs of tuberculosis, diphtheria, typhoid, pus; their incidence in body, dust. Sterilisation and Pasteurisation of food, milk. Vaccine and serum therapy. Anaphylaxis. Special diagnostic bacteriological tests.

†ELEMENTARY CHEMISTRY AND PHYSICS. 20 Lectures and Demonstrations.

Measurement. Difference between solids, liquids, gases. Air: composition, properties. Vapour pressure. Barometer. Hygrometer. Water: nature, composition, properties, behaviour with temperature, hard and soft water, softening and purification of water. Heat: temperature, change of state, transmission of heat. Light: propagation, reflection, refraction, radiation, methods of illumination. Sound: the production and transmission of sound, noises and musical notes, physical characteristics of sound waves. Elementary facts of electricity.

Matter: elementary and compound bodies, laws of chemical combination, the common elements and their compounds, combustion. Nature and constituents of food. Chemistry of Digestion. Crystalloids and colloids. Disinfectants and antiseptics.

†PSYCHOLOGY. 25 Lectures.

Definition. Scope and Application of Psychology. How Psychology is being applied in Medicine, Education and Industry. The evolution of behaviour. Modern views of ability. Vocational guidance.

Scientific method in Psychology. The fundamental aspects of consciousness. The fields of sense and of imagery. Types of behaviour. Theory of instinctive behaviour and emotions. The association of ideas. The learning process. Habit formations. Perception, thinking, imagination. The process of coming to a decision. Temperament and disposition. Character. Difficulties in the emotional life. Psycho-analytic method and theory.

TROPICAL NURSING (Dame Sidney Browne Lectureship).
12 Lectures.

Malaria and Blackwater Fever. The Dysenteries. Sprue. Leishmaniasis. Ankylostomiasis and Worm Infections. Plague. Trypanosomiasis. Leprosy. Beri-beri. Heatstroke. Personal hygiene in the Tropics. Filariasis and Elephantiasis. Hepatic Abscess. Schistosomiasis. Undulant, Dengue and other Fevers.

OPHTHALMIC NURSING. 7 Lectures.

The anatomy of the orbit and nasal sinus in connection with it. The Lids. The Conjunctiva. The Cornea. Iritis. Glaucoma. Cataract.

* Forming part of the course for Health Visitors.

† Specially arranged to cover the syllabus of the London University Diploma in Nursing.

‡ Forming part of the course for Midwife Teachers.
