London NW 14NS.

Dear Marion,

I am delighted with the questions! My only query would be on Section B Question 8. Is the mobility referred to physical e.g. in respect of a post operative geriatric patient or class mobility or geographical mobility? If it applies to D.L.A's I assume it is the first and I am not then sure that the role of the nurse is to 'obviate the consequences' so much as to promote mobility. Am I dense? the students might be !!

I'm just on my way to Stockholm.

Yours sincerely,

SR McFarlane of Llandaff.
